KOMPLYINT OY

Digital services for business

Data, automation and software solutions

Small technical problems consume real business time. Komplyint helps teams simplify reporting, reduce manual repetition and improve the tools they already use.

SERVICE PORTFOLIO · ENGLISH · 2026

Six practical service areas

We agree on a sensible scope for each project. Every engagement is assessed and quoted separately.

01

Excel, data & reporting

Clearer reporting, fewer spreadsheet errors and structured data.

02

Microsoft 365 & automation

Make repeated business steps easier using tools your team already owns.

03

Websites & maintenance

Useful updates and improvements to existing business websites.

04

Small software & integrations

Focused internal tools and improvements, without unnecessary platform complexity.

05

Software testing & QA

Make functional issues visible before release.

06

Digital office support

Well-defined document and information-management tasks.

SERVICE PORTFOLIO · ENGLISH · 2026

Six practical service areas

01 / SERVICE

Excel, data & reporting

Clearer reporting, fewer spreadsheet errors and structured data.

Typical requests

- Excel formulas and workbook repair
- Data cleaning and consolidation
- Power BI dashboards and repeatable reporting

Deliverable

A functional report or file, verification and handover notes.

Scope and limitations

Data quality, permissions and licence requirements are confirmed first.

02 / SERVICE

Microsoft 365 & automation

Make repeated business steps easier using tools your team already owns.

Typical requests

- Forms, Lists and SharePoint processes
- Power Automate notifications and approvals
- Teams, Outlook and OneDrive workflows

Deliverable

A scoped automation with functional tests and maintenance notes.

Scope and limitations

Available licences and permissions determine what can be automated.

SERVICE PORTFOLIO · ENGLISH · 2026

Six practical service areas

03 / SERVICE

Websites & maintenance

Useful updates and improvements to existing business websites.

Typical requests

- Content and mobile usability fixes
- Contact-form and navigation verification
- Agreed website updates

Deliverable

Defined improvements and functional checks.

Scope and limitations

Hosting, on-call availability and security responsibilities require agreement.

04 / SERVICE

Small software & integrations

Focused internal tools and improvements, without unnecessary platform complexity.

Typical requests

- Internal trackers, forms and calculators
- Scoped web applications
- Integrations through suitable supported APIs

Deliverable

Agreed functionality, tests and deployment notes.

Scope and limitations

Critical integrations and enterprise systems need a separate assessment.

Six practical service areas

05 / SERVICE

Software testing & QA

Make functional issues visible before release.

Typical requests

- Website and form functional tests
- Reproduction and documentation of defects
- Verification of fixes

Deliverable

Prioritised issue list and a test summary.

Scope and limitations

Not a security audit or a guarantee that software contains no defects.

06 / SERVICE

Digital office support

Well-defined document and information-management tasks.

Typical requests

- PowerPoint and Word template preparation
- Organising files and spreadsheet templates
- Reports, instructions and simple documentation

Deliverable

Editable documents and clear handover.

Scope and limitations

Ongoing assistant work and personal data handling require separate agreement.

How we work

01 / Discover

Explain the current problem and the outcome you need.

02 / Scope

Agree on deliverables, pricing, responsibilities and timing.

03 / Implement

Reuse suitable tools, make improvements and verify functionality.

04 / Handover

Receive the agreed files or software, plus practical usage notes.

Tell us what you need to make work better

Send us a short description by email. Please do not send sensitive customer information in an initial enquiry.
