KOMPLYINT OY

Digital services for business

Digital tools that make everyday work easier.

We help businesses improve reporting, automate repetitive tasks and build small software tools. We discuss the task with you and agree on the scope before work begins.

Our services

01 / SERVICE

Excel, data & reporting

Get spreadsheets in order and make reporting easier to maintain.

Examples of tasks

- Excel troubleshooting, formulas and Power Query updates
- Combining, cleaning and checking data
- Building and updating Power BI reports

What you get

A working spreadsheet or report with clear instructions.

What we agree in advance

We check the source data, access permissions and any required licences before starting.

02 / SERVICE

Microsoft 365 & automation

Reduce repetitive work with the Microsoft 365 tools you already use.

Examples of tasks

- Setting up and improving Forms, Lists and SharePoint processes
- Power Automate notifications and approval processes
- Improving workflows in Teams, Outlook and OneDrive

What you get

The agreed automation, functional checks and maintenance notes.

What we agree in advance

Implementation depends on the necessary access permissions and licences.

Our services

03 / SERVICE

Websites & maintenance

Improve existing websites, forms and content without a full rebuild.

Examples of tasks

- Content, layout and mobile usability improvements
- Testing contact forms and key website functions
- Small website updates and content changes

What you get

The agreed changes, a functional check and written handover notes.

What we agree in advance

We agree separately on hosting, security and downtime responsibilities. Round-the-clock support is not included.

04 / SERVICE

Small apps and integrations

Small applications and integrations built around a specific business need.

Examples of tasks

- Internal trackers, forms and calculators
- Small web apps and interface improvements
- Moving information between systems using available APIs

What you get

The agreed features, testing and any source-code or deployment instructions included in the scope.

What we agree in advance

Large systems, critical integrations and 24/7 support are assessed separately.

Our services

05 / SERVICE

Software testing & QA

Testing before release and after changes.

Examples of tasks

- Functional testing of websites and forms
- Reproducing issues, recording findings and checking fixes
- Agreed browser and mobile tests

What you get

A test report, prioritised issues and steps to reproduce them.

What we agree in advance

Testing is not a security audit or a guarantee that software is free of defects.

06 / SERVICE

Documents and office support

Help with documents, spreadsheets and organising files.

Examples of tasks

- Finishing PowerPoint presentations and Word templates
- Organising files and creating Excel templates
- Short reports, documents and user instructions

What you get

Editable files and concise instructions for the agreed work.

What we agree in advance

Ongoing administration, customer service and handling personal data require separate agreement.

HOW WE WORK

01 / Discuss the task

Tell us what takes too much time or is not working as it should.

02 / Scope and quote

We agree on the tasks, responsibilities, price and timetable.

03 / Build and test

We use existing tools where possible and test the agreed changes.

04 / Handover

You receive the finished work, instructions and details of any follow-up support.

Tell us what you need help with.

Briefly describe the task. We will let you know whether we can help and what information we need to prepare a quote.
